

Filter Vessel Refurbishing/Reconditioning

Industrial Filtration Solutions

BEFORE

AFTER

FILTER VESSEL RESTORATION

Over time, industrial filter housings are exposed to corrosion, pressure cycling, environmental wear, and mechanical stress that can compromise both performance and reliability. Rather than replacing costly equipment, PFP offers a structured vessel refurbishing & reconditioning process designed to restore structural integrity while extending service life of your filtration equipment.

Our refurbishing service ensures that your filter housing will be delivered back to you in like-new condition, **ready for years of continued service.**

THE REFURBISHING PROCESS

1
Choose On-Site or In-House Service

2
Inspection & Custom Assessment

3
Complete Refurbishment Services

4
Final Testing & Quality Assurance

Ready to get started? Visit us at www.pfpusa.com to learn more!
